PERSONAL INFO

08/01/1994
Rovereto (TN)

PROGRAMMING LANGUAGES

C++, Swift, Java, OCaml, Javascript,
Typescript, Assembly, PHP, SQL

OTHER

HTML, CSS, XML, WordPress,
Arduino, Atmel Based System,
AngularJS, ReactJS, Node.js, React
Native, Redux, ReactiveX, VueJS,
Docker, Zeplin

LANGUAGES

- Italiano (Native)
- English (PET Certificate)

EXPERIENCES

H-ACK WINE

Attendant in 2015

Internet of Things - Arduino Hackaton 100100 Challenge

Attendant in 2015

JACOPO MARTINELLI

SOFTWARE DEVELOPER

EDUCATION

Diploma in Elettronica e Telecomunicazioni
ITI's G. Marconi - Rovereto (TN)
2008 - 2013

I've learned how to manage systems and devices that interact with their environment using sensors and actuators. It gave me a strong background in electronics and low level programming.

Laurea Triennale in Informatica - Università degli studi di Trento (TN)
2013 - 2018

I have improved my ability to learn quickly and efficiently new programming languages. I have followed many courses on functional programming, objective oriented programming, algorithms and machine learning.

PROFESSIONAL PROFILE

I'm really into design patterns and I'm always trying to improve the code quality by applying paradigms to solve coding problem. For this reason I found Javascript the best language to apply a lot of different techniques. In particular I like to work with NodeJs, Angular, and React.

I'm always experimenting with new technologies and frameworks. Learning is my main occupation. I love working in a team, sharing knowledge and best practices.

WORK EXPERIENCE

Web Developer | Farnedi ICT

Jan 2014 - Mar 2014

My job was to develop and maintain a series of websites on WordPress using my knowledge of PHP, Javascript, JQuery, HTML and CSS.

Android & iOS Developer | Openmove

Jan 2015 - Apr 2015

I have worked with Obj-C, Java for Android and HTML+CSS+JS in a Cordova environment, developing for both iOS and Android devices.

iOS Developer | Motorialab

Apr 2016 - Sept 2017

I've contributed to the development of a native iOS app called 'Salewa'. I worked mainly on the Front-end part of the application. I worked with Obj-C and Swift.

Full-Stack Developer & Software Architect | Farnedi ICT

Mar 2017 - present

My job consisted in planning and developing web based applications from scratch. I've learnt how to maintain and deploy medium and large scale application. I've worked mainly with React and Angular on the Front-end; with Node.js, Express and Sequelize on the backend.
